

Aim:

To learn about how to create epics, user story, features, backlogs for your assigned project.

Steps:

1.

The screenshot shows the Azure DevOps interface for a project named 'Music Playlist Batch creator'. The left sidebar contains navigation options: Overview, Boards, Work items, Backlogs, Sprints, Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Artifacts. The main area displays a work item titled '21 Auto Playlist Creation' with a state of 'To Do'. The description field is empty, and the discussion section contains a placeholder for a comment. The right sidebar shows the 'Details' tab with fields for Priority (2), Effort (3), and a deployment status section. The URL at the bottom is 'https://dev.azure.com/kavinprashadb2024aim0699/Music Playlist Batch creator/_workitems'.

2.

The screenshot shows the Azure DevOps interface for the same project. The main area displays a work item titled '22 As a user, I want to create playlists based on categories so that I can listen easily.' with a state of 'To Do'. The description field is empty, and the discussion section contains a placeholder for a comment. The right sidebar shows the 'Details' tab with fields for Priority (2), Effort (4), and a deployment status section. The URL at the bottom is 'https://dev.azure.com/kavinprashadb2024aim0699/Music Playlist Batch creator/_workitems'.

3.

The screenshot displays the Azure DevOps web interface for a project named 'Music Playlist Batch cr...'. The left sidebar contains navigation links for Overview, Boards, Work items, Backlogs, Sprints, Queries, Delivery Plans, Analytics views, Repos, Pipelines, Test Plans, and Artifacts. The 'Work items' section is active, showing a list of tasks. The selected task is '23 Design user interface for playlist creation', which is in the 'To Do' state and belongs to the 'Music Playlist Batch creator' area. The task details panel on the right includes a description field (currently empty), a discussion section with a comment box, and a planning section with a priority of 2. The deployment section provides instructions on how to track releases and report deployment status. The development section offers guidance on linking Azure Repos commit, pull request, or branch. The related work section is currently empty.
